## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30, drawn to a system for forming absorbent articles with three different supply stations, wherein each station has an unwinding device, classified in class 242, subclass 550.
- II. Claims 31-44, drawn to a process for splicing the same material from first and second rolls, classified in class 242, subclass 554.
- III. Claims 45-59, drawn to a process of unwinding a roll of material, classified in class 242, subclass 552.

Inventions I and II, III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice a materially different process, such as unwinding items other than absorbent articles. The process II and III can be practiced by a materially different apparatus, such as one not including a splicing mechanism or having only one supply station.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and III, restriction for examination purposes as indicated is proper.
